

↑ ゴシツク 12P

The image displays a 20x10 grid of circles. The pattern is periodic with a period of 4 columns. The columns are defined as follows:

- Column 1: All white circles.
- Column 2: All black circles.
- Column 3: All white circles.
- Column 4: All black circles.

This 4-column pattern repeats five times across the 10 columns of the grid. The rows are independent of each other, meaning the pattern is consistent across all 20 rows.
